TREE
FORUM

Celtis sp. – životni vijek

Celtis occidentalis L. – oko 200 godina (USDA- FS)

Celtis laevigata L. – oko 150 godina (USDA- FS)

...

Celtis australis L. – oko 1000 godina (Jurc i dr., 2016), (400 - 1000)

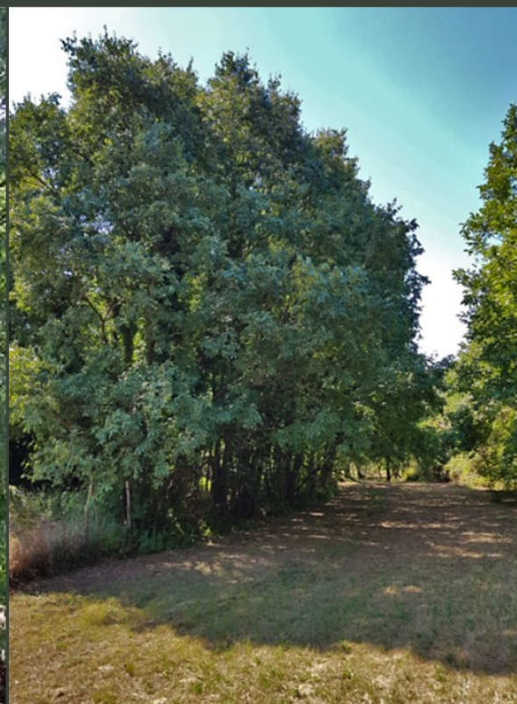

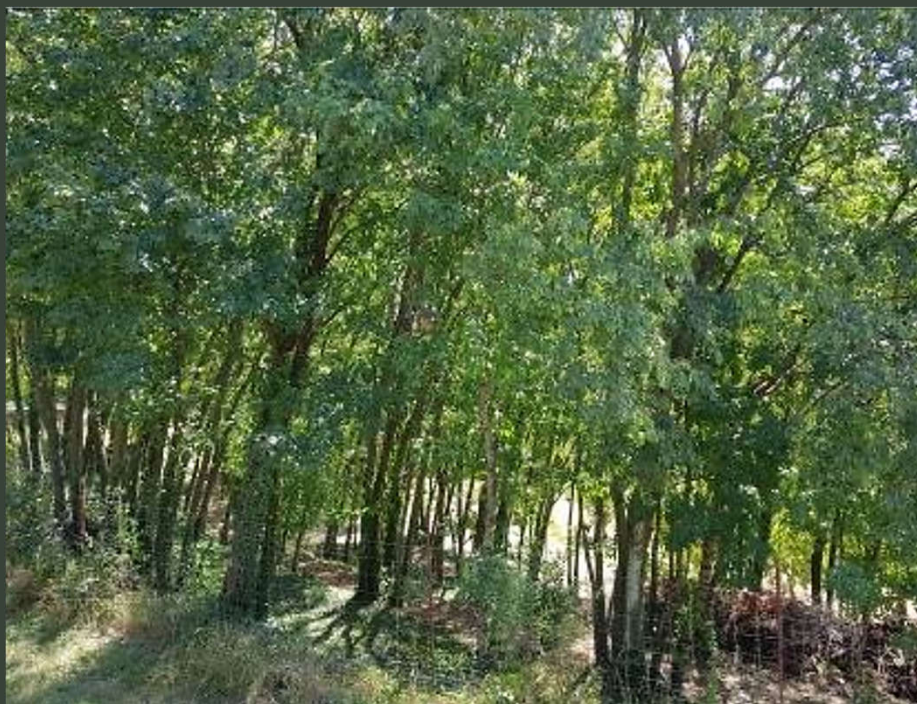

Celtis australis L. Varoš, Split
starost 120 godina

Celtis australis L. – stanište

Prirodno (potencialne sjemenske sestojina)

Fraxino orni-Quercetum ilicis Horvatić (1956) 1958

Mehmedović, F., 2017 ZNAČILNOSTI DVEH POTENCIALNIH SEMENSKIH OBJEKTOVNAVADNEGA KOPRIVOVCA (*Celtis australis* L.) V SLOVENIJI

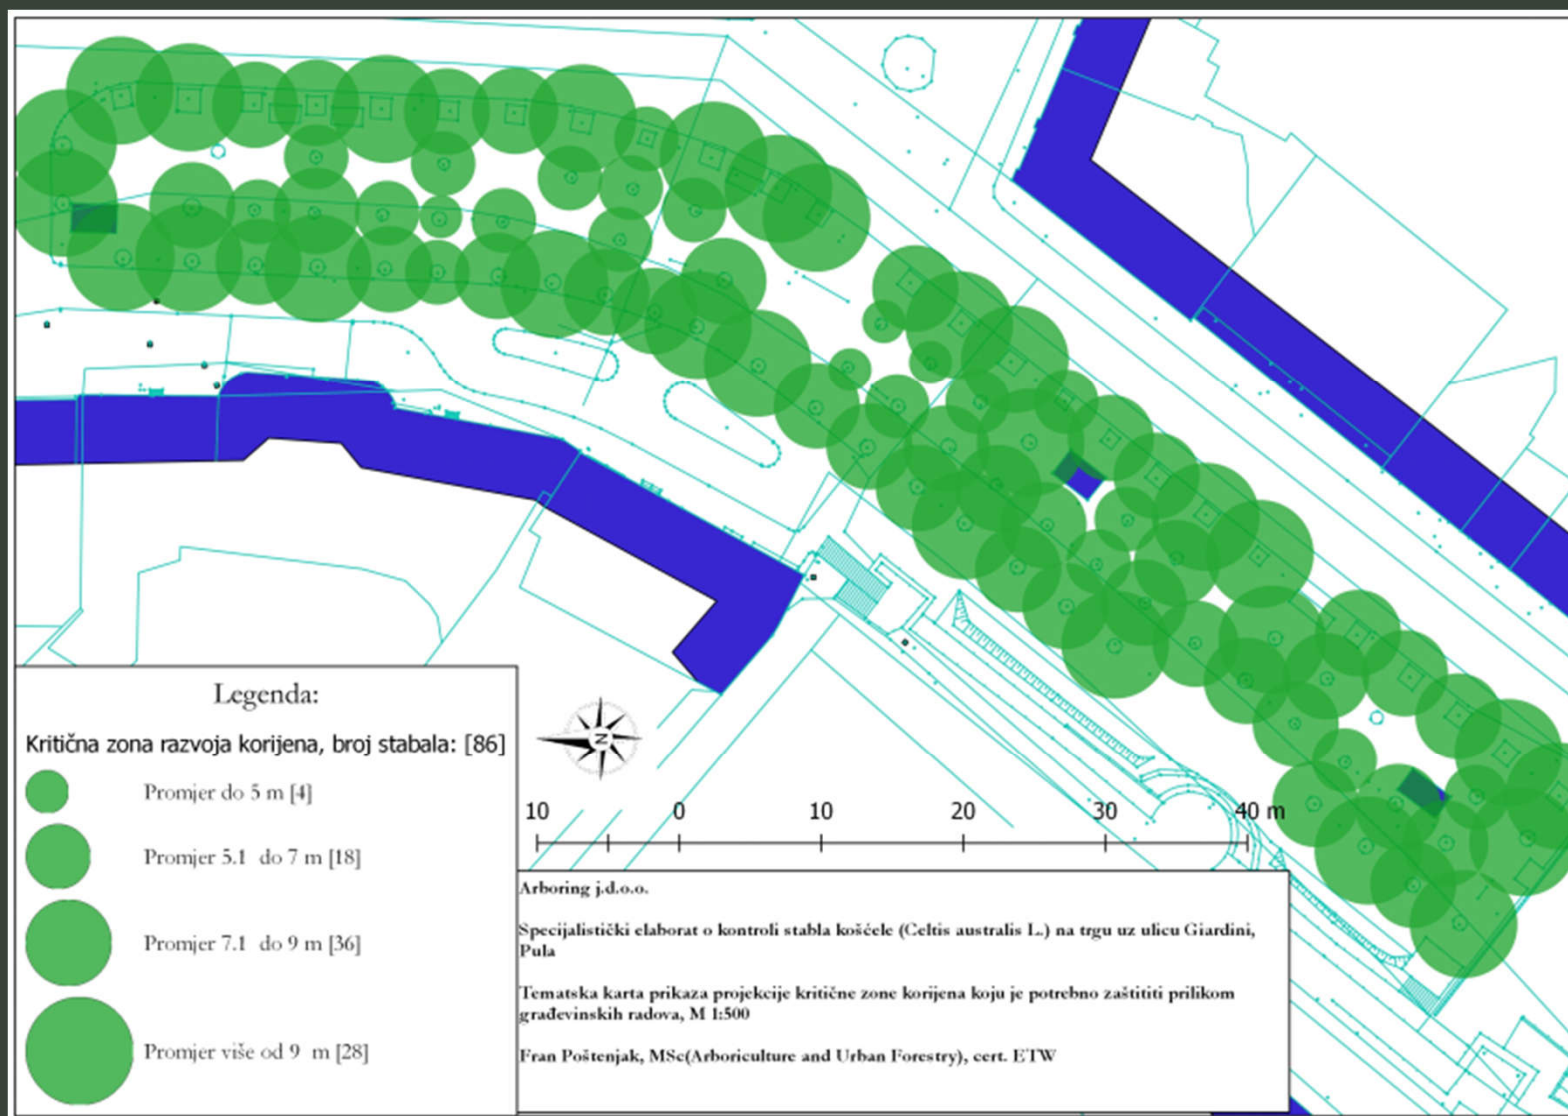

Giardini

Zona razvoja
korijena 2-3 dužine
projekcije krošnje

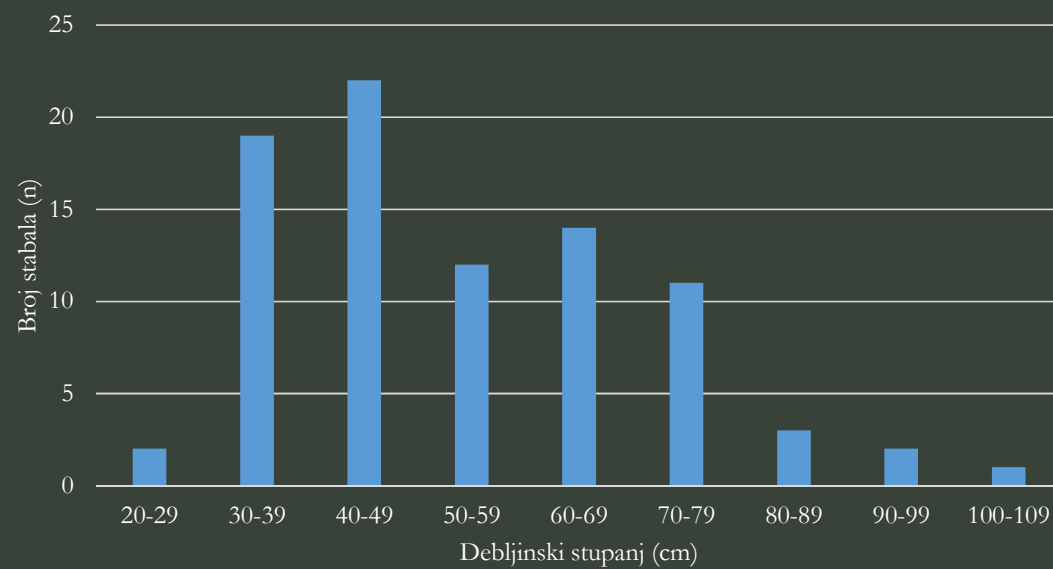

Kritična zona
zaštite korijena

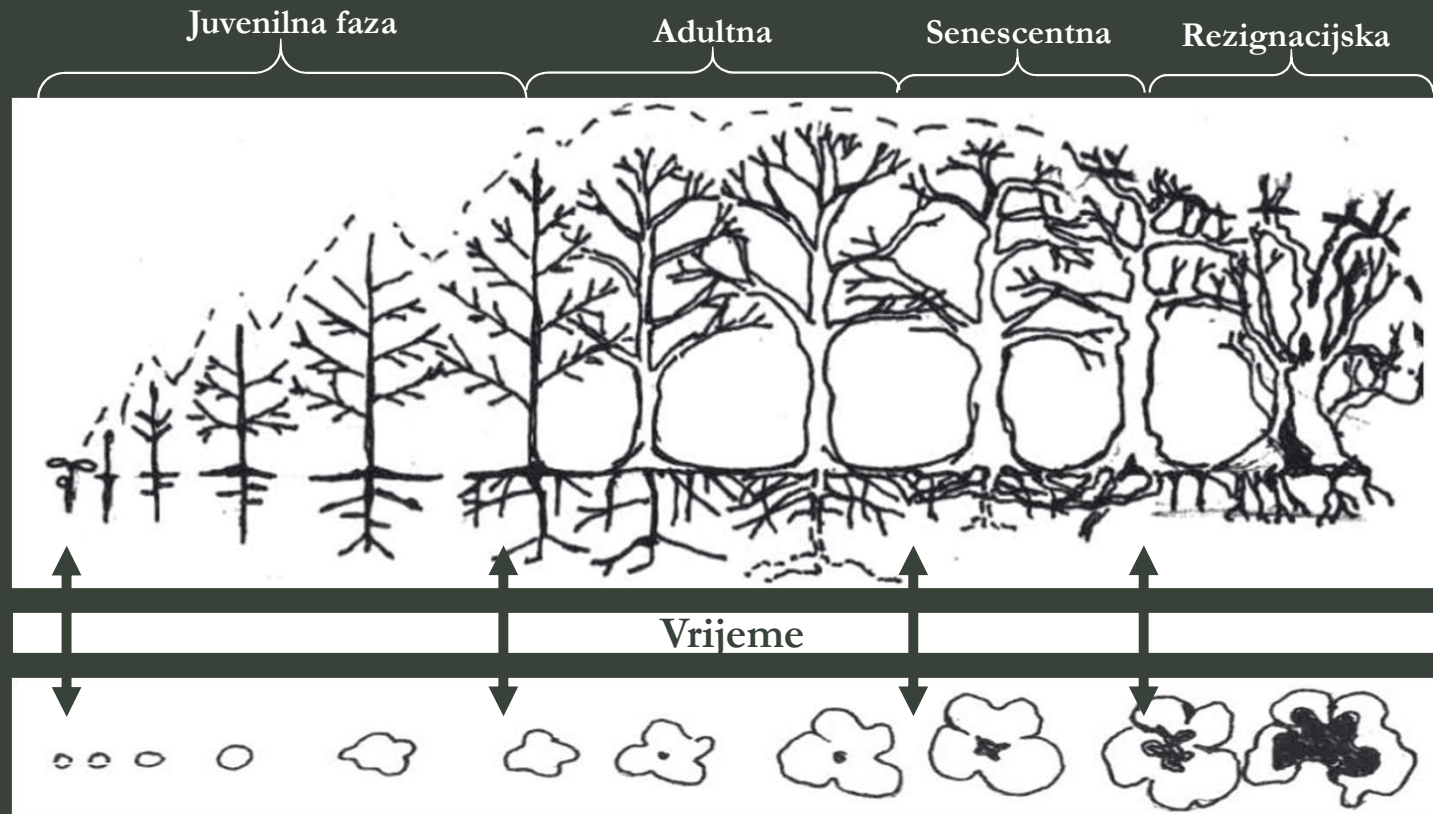

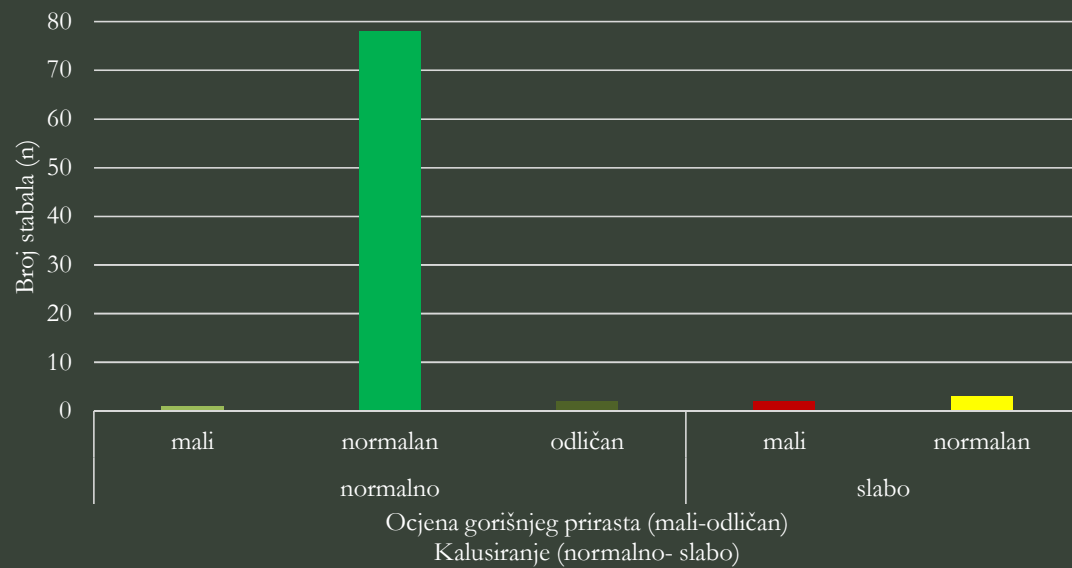

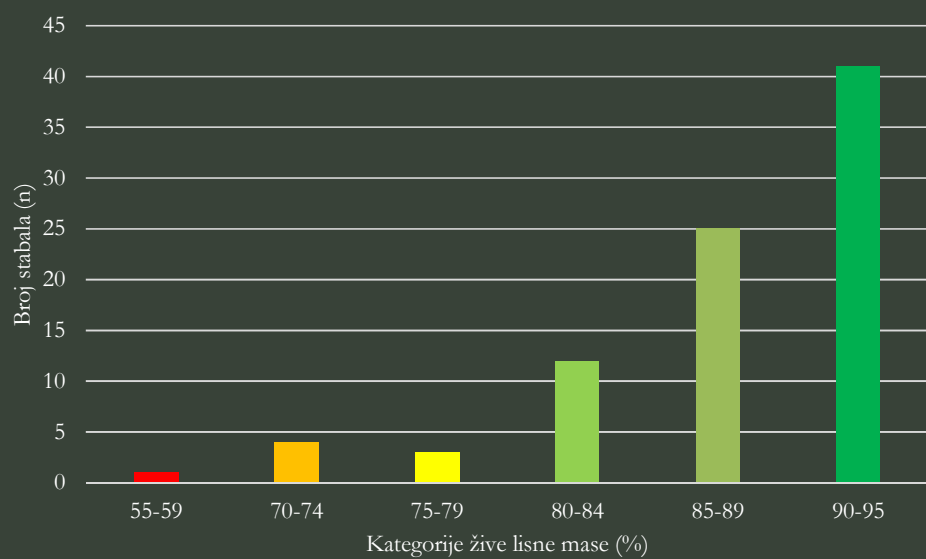

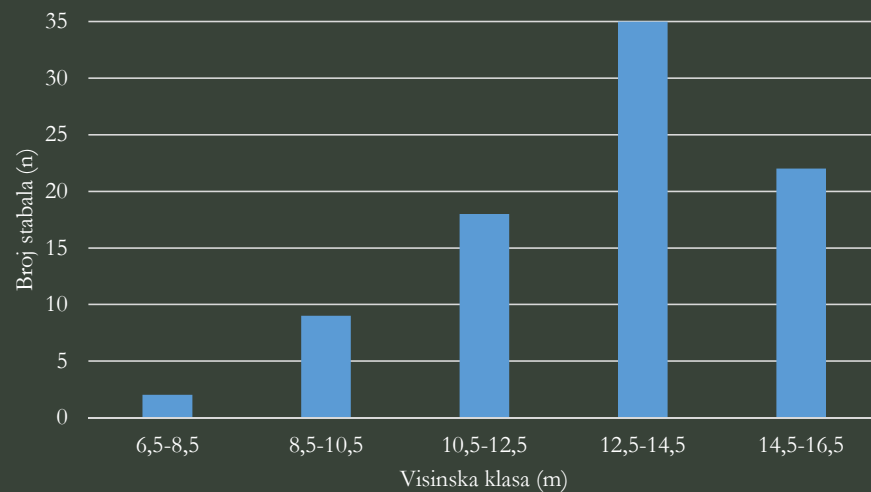

Vizualna kontrola 87 stabala korpivića (*Celtis australis* L.)

THEF (nivo 2 ANSI A300) 148 parametara i „H” rating

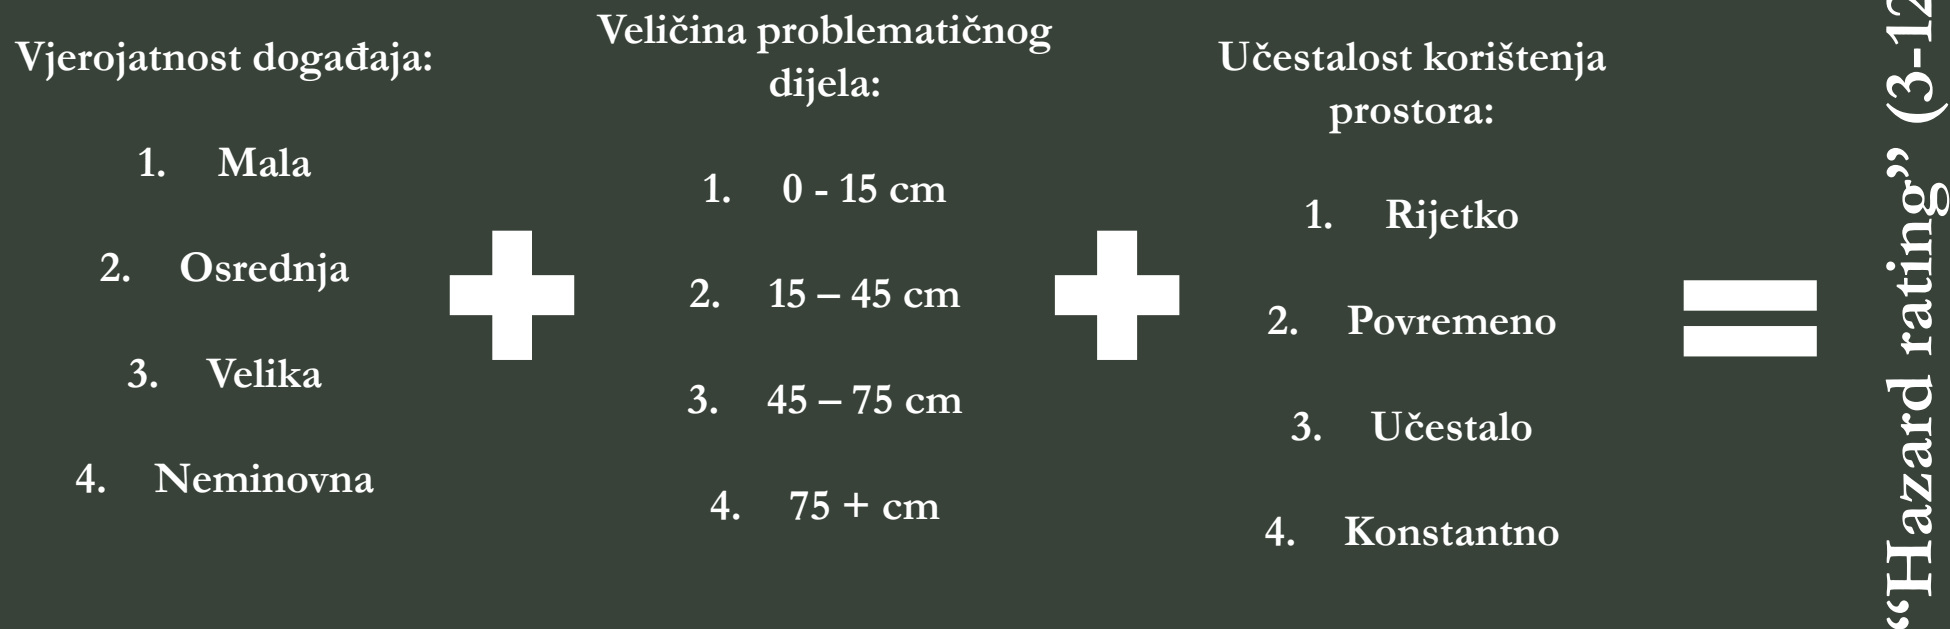

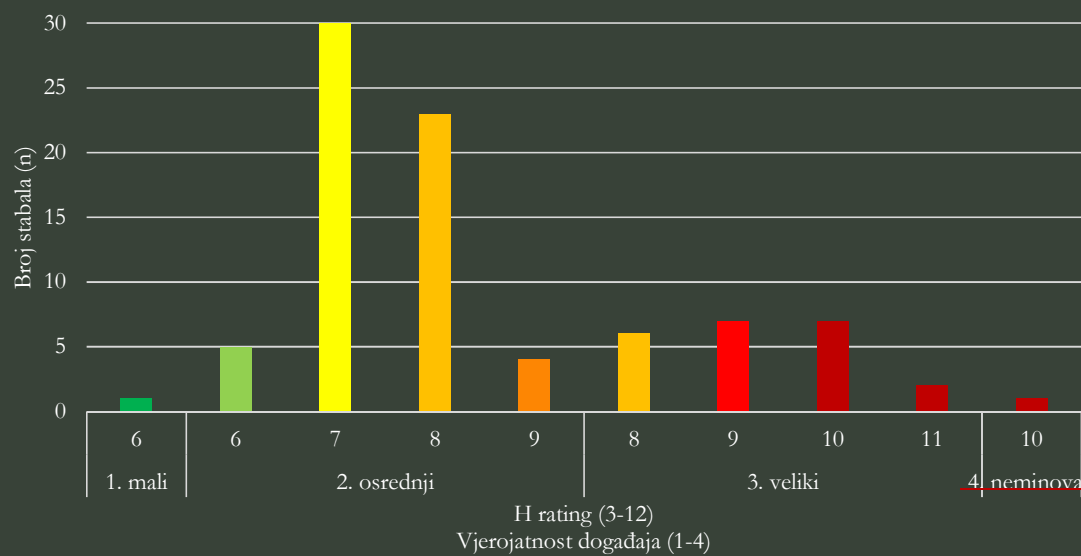

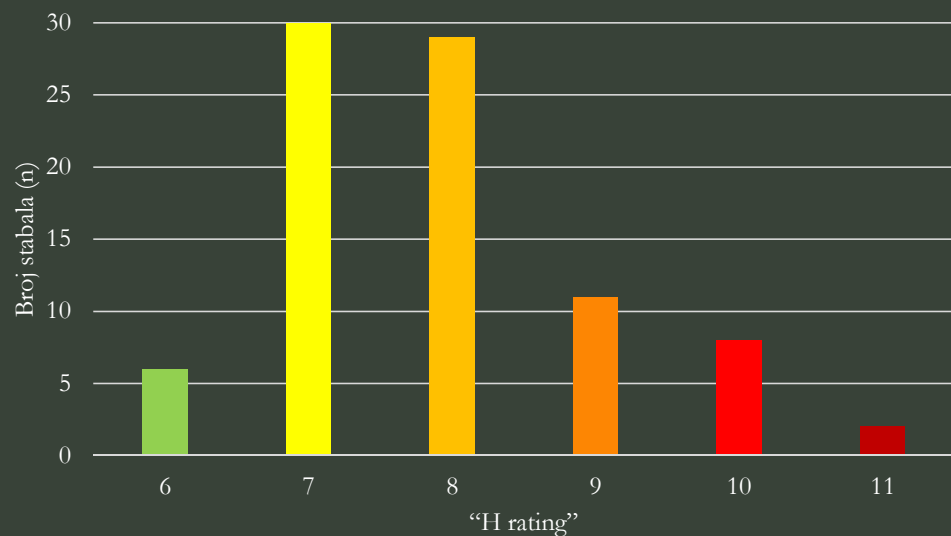

Razvojne faze stabla: (Raimbault 1995; Lonsdale 1999; Fay 2002)

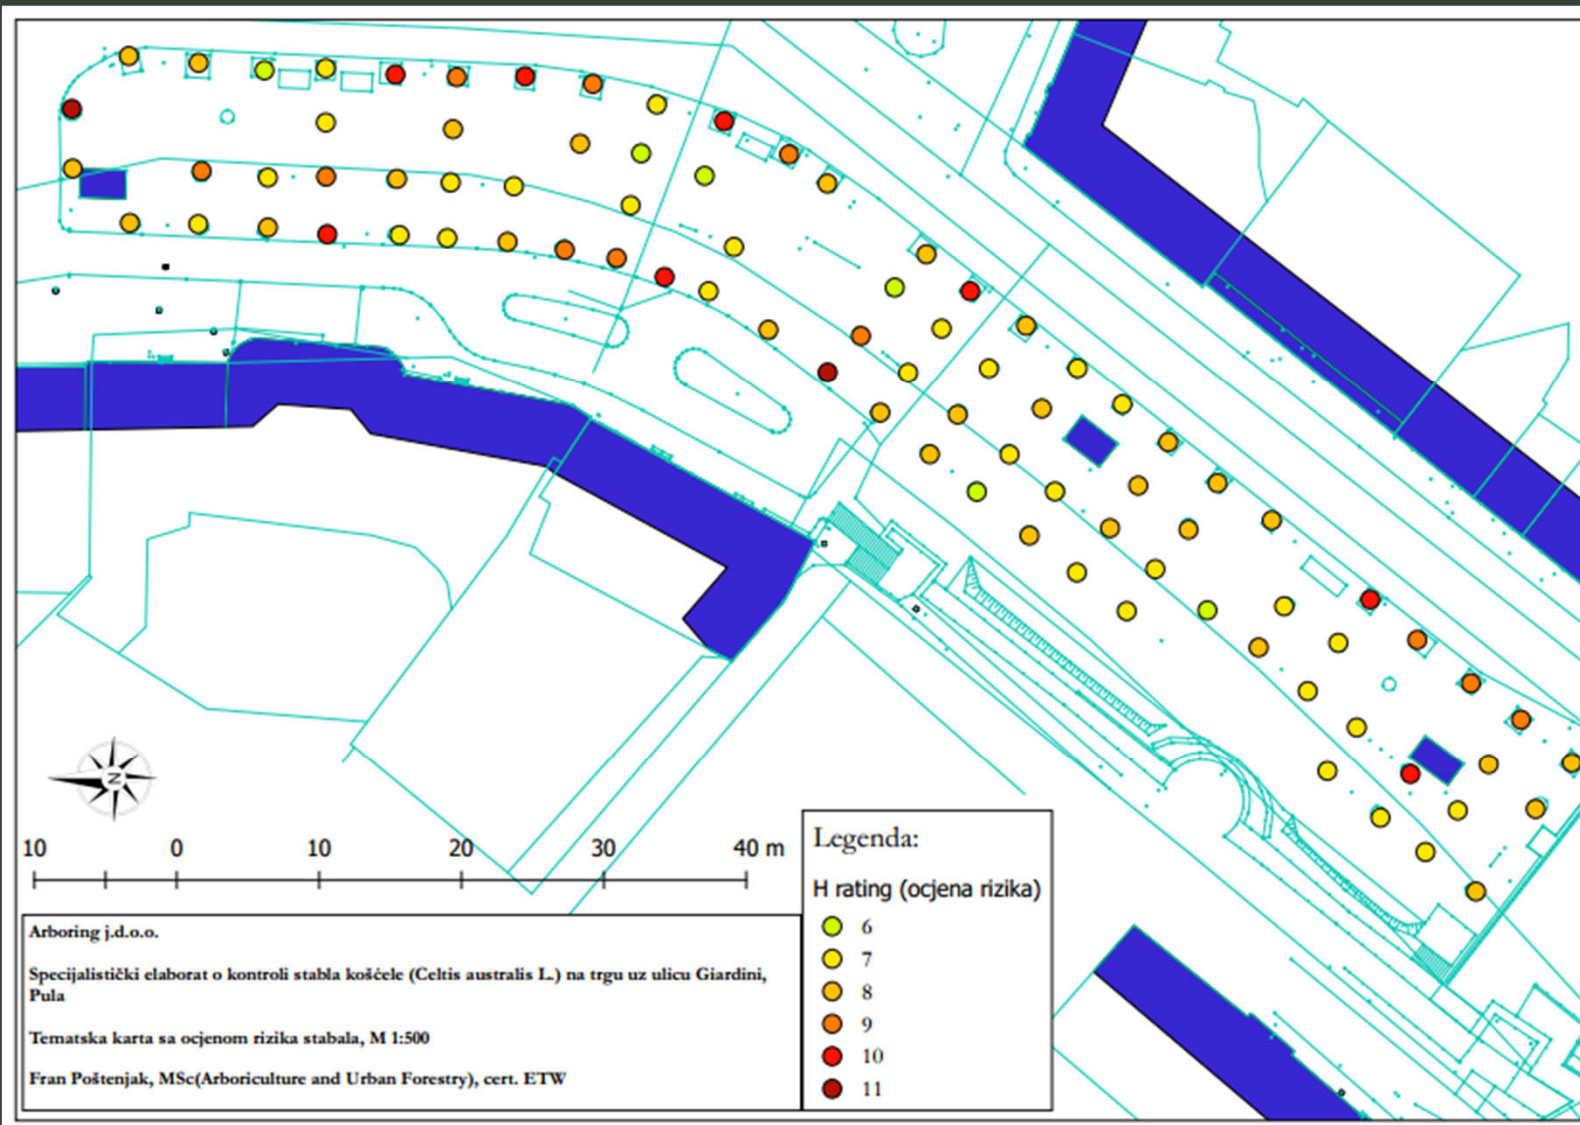

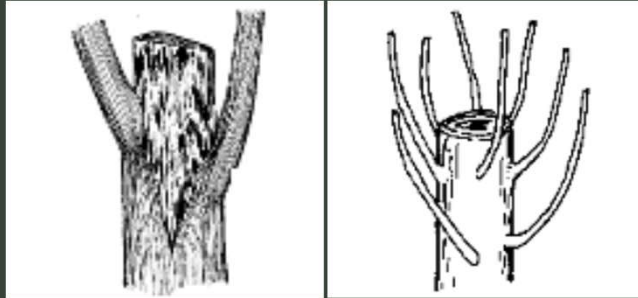

Rizik loma stabla

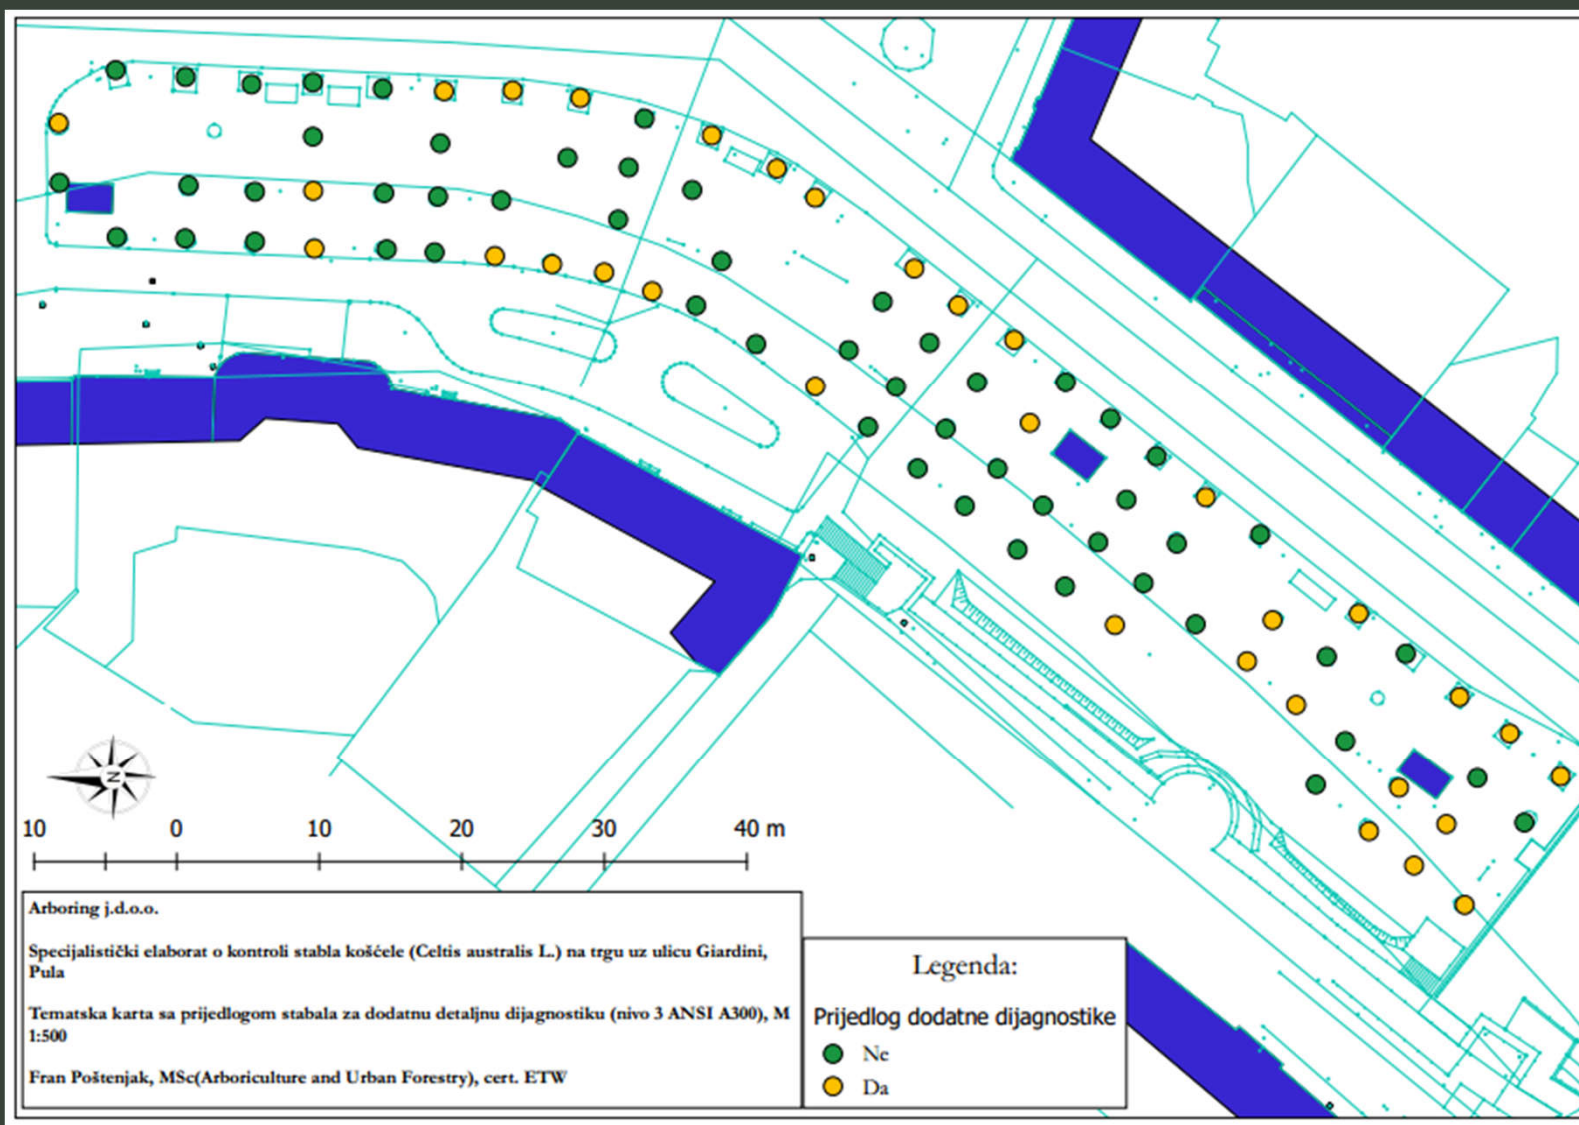

Trulo i napuklo debacle nad terasom- uklonjeno unutar 18 sati

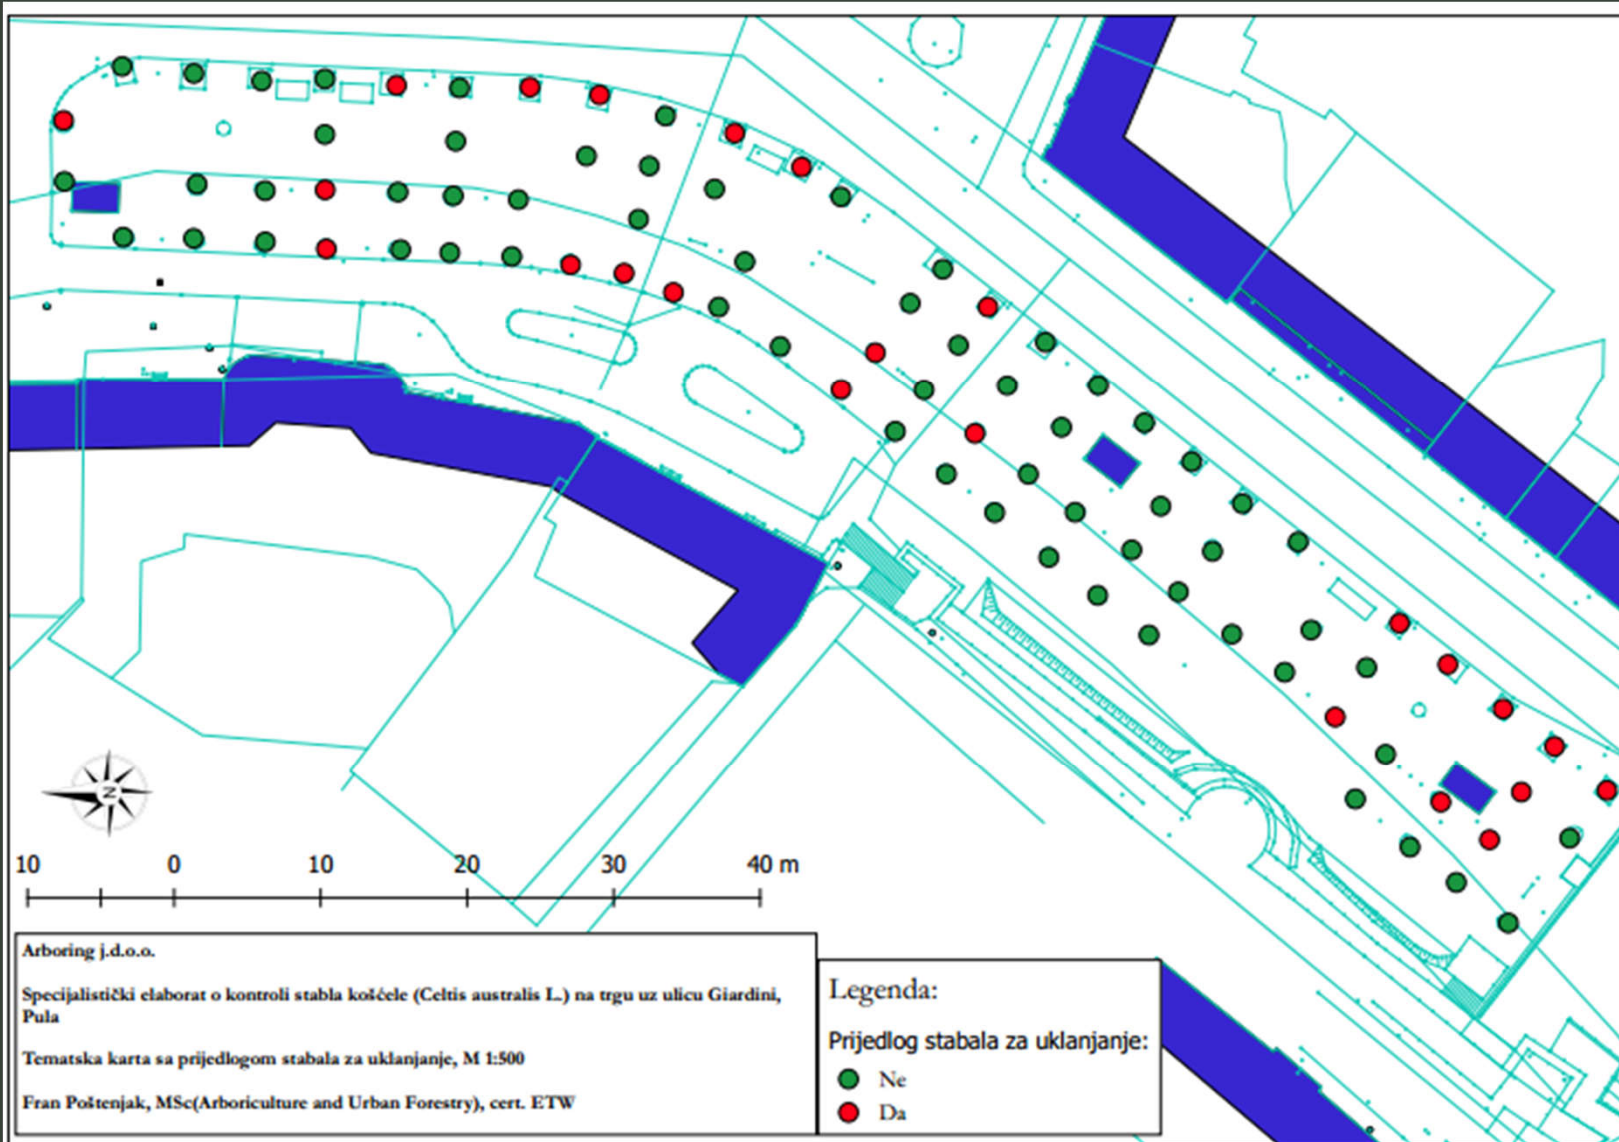

Broj stabala za
dijagnostiku: 32

Broj stabala za
uklanjanje: 24

Osobna iskustva

- Religijska vjerovanja
- Psihičke i zdravstvene koristi
- Estetska vrijednost i diferencijacija prostora

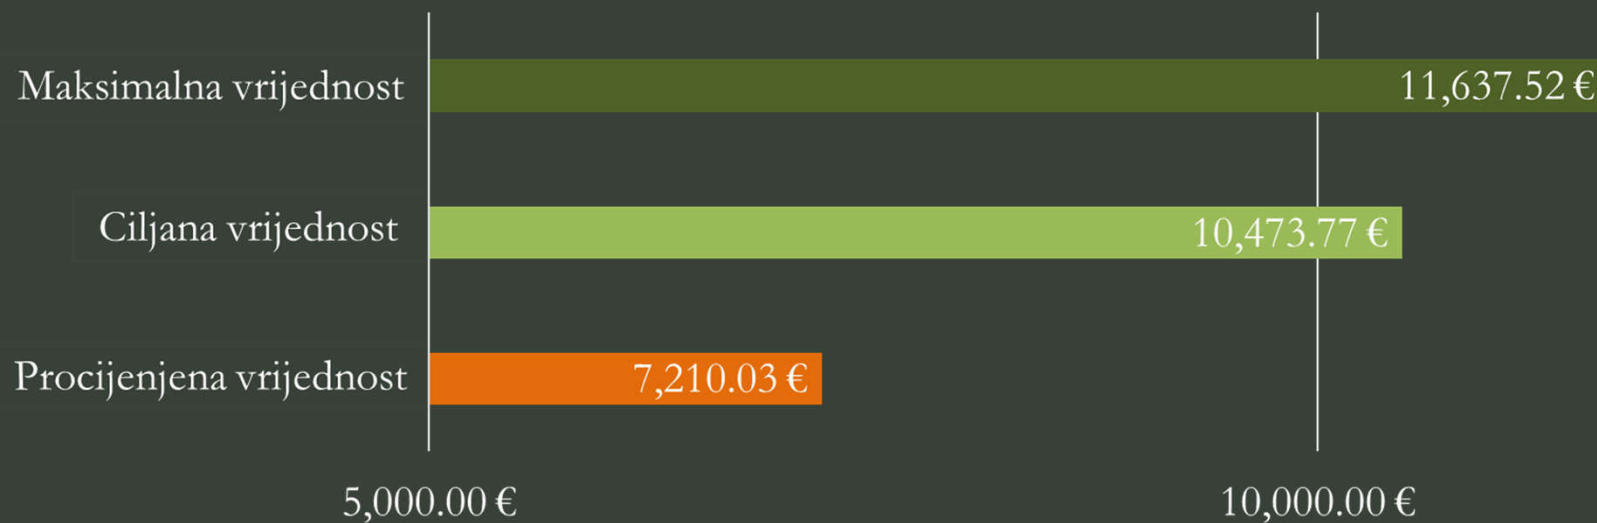

Fizičke koristi:

- Povećanje vrijednosti nekretnina
- Zajsenjivanje i hlađenje prostora
- Intercepcija oborina
- Uklanjanje polucije
- Umanjivanje efekta 'Toplinskog otoka'

Osnovne koristi urbanih stabala

Kalkulacija godišnjih koristi urbanih stabala u odnosu na njegu stabala

Poštenjak F., EUGIC 2017
